

Highlight your network programs and services

Graphical depiction of multiple data points layered on top of your map.

Dynamically view all programs and services

**Grant Proposals:** *Hard to keep track of programs and services across multiple agencies?*  
Built in taxonomy to easily find list of programs and service locations. Nice visuals that will make your grant proposals stand out from the rest.

**Network Management:** *Feeling survey fatigued?*  
Customized data collection tool that captures initial program information, which is prefilled annually to capture any changes and make updates easy for your agencies.

**Referral Management:** *Staff not sure how to find services for their patients?*  
Staff can use the easy access network map to search for services and find programs in and outside of their agency.

**Social Determinant Mapping:** *Can't figure out how to capture SDOH factors?*  
Layer on different types of data, from location of services like food pantries to actual health reporting such as COVID-19 hotspots per zip code ([see article](#))

- Environmental network scan
- Build custom taxonomy
- Determine communication tools and workflows

- Kick-off presentation to network agencies
- Data collection
- Build GeoMap
- Feedback and enhancements

- User training
- Annual updates and support
